

Telegram

Telegram is a cloud-based instant messaging and voice over IP service. Users can send messages and exchange photos, videos, stickers, audio and files of any type. Users can add multiple devices to their account and receive messages on each one. Connected devices can be removed individually or all at once. Telegram accounts can be deleted at any time and they are deleted automatically after six months of inactivity by default, which can optionally be changed to 1 month and 12 months.

Website interface of telegram

Mobile interface of telegram
