

Swiggy

Swiggy is a digital platform, used for online food ordering and delivering. It provides services like online ordering, restaurant search, etc. User can search food by the name of dishes\restaurants and even the dishes available from any restaurants with price. We are able to check the reviews even.

Website Interface

Mobile Interface

Operations	Description	Website	Mobile
Home	User have to set the address and have to search for dishes. User will get the different restaurants, Dishes to select. Even track your delivery.	✓	✓
