

MESSENGER

Messenger is a smartphone application specifically designed to handle the messages section in the Facebook mobile app. In this platform, the user can send and receive text as well as media messages to his Facebook contacts. The purpose of this platform is to let the user engage in conversations with his/her Facebook friends without going through the hassle of opening a dedicated Facebook page and navigate through a cluttered environment.

Mobile App Interface

I) Home Tab

II) People Tab

III) Settings Tab

Let's look at the features and operations that a user can perform in the Facebook Messenger Application on the next page.

OPERATION NAME	DESCRIPTION	Mobile
Messages (I)	All the latest updates on various topics and followed accounts is available here.	✓
People Tab (II)	Here the user can search for specific contact to either start a conversation or revisit the last conversation. People who are currently online are also listed in this tab.	✓
Settings Tab (III)	A user can access information and settings specific to the Messenger application and not to the general Facebook account in this Tab.	✓
Active Status Button	In here, one can choose whether they want to keep the active status on or off for other users to detect their presence online.	✓
Message Requests Tab	Facebook allows users to send messages to people who are not in contact with them, such messages are received in the Message Requests Tab where one can decide whether to reply or not.	✓
Notifications & Sound Tab	Here one can set the notification and sound preferences pertaining to the accessibility of the application.	✓
Manage Storage Tab	This option allows the user to clear unwanted cache memory and free up the space occupied by the application on the device.	✓
Switch Accounts Tab	A single Messenger app can be used to run multiple Facebook accounts and this tab allows the user to switch between them seamlessly without requiring to log in on switching.	✓
Account Settings Tab	Here, the user can edit their personal information pertaining to the Messenger App.	✓

Conclusion: The Messenger app allows a simple yet powerful platform for a Facebook user to connect with their friends on the go, using their smartphone.
