# CISCO WEBEX

Cisco WebEx is a cloud-based suite of productivity tools that keeps teams connected. Including WebEx Teams, WebEx Meetings, and WebEx Devices, this suite merges the web conferencing platform and the Spark team collaboration tool from Cisco.

Website Interface

Mobile interface

OPERATION NAME	DESCRIPTION	Website	Mobile
Navigation Menu	Used to Switch among message, team, call, and meeting views. Messages appear by default, but teams, calls, and meetings are just a click away.	✓	✓
Status & Preference	This is to click profile picture to update our picture or name, access our settings and preferences, and set our status.	✓	✓
Search panel	Just click Search to search through the history of your conversations to find people you're talking to, spaces you're in, messages you received, and files you need.	✓	✓
Spaces	Your group work takes place in spaces, either in groups or in direct messages with another person. They display prominently so you can get to them whenever you need to.	✓	✓
Help	On Windows you'll see Help at the bottom of your spaces list. By default, that link brings you to WebEx Teams page on the Collaboration Help site, but your administrator might customize that link to direct you to another site instead.	✓	✗
Create a space	Just click, and select Contact a Person to create a direct message space between you and just one other person, or select Create a Space to start a group conversation.	✓	✗

Devices	On Windows you can connect automatically with WebEx devices from the Connect to a Device menu, You can also connect to your desk phone from the menu to make calls and join meetings. If you have a lot of devices close by, you can set certain devices to not automatically connect.	✓	✓
Activities	There are lots of activities like-Messages, People, Content, Schedule and Call/Meet.	✓	✗
My threads	To see threads that you are a part of in the space.	✓	✗

Conclusion:

In the conclusion we get while coming to mobile view the activities are less comparing web view.
