# Quora

Quora is a digital platform to gain and share the knowledge, where user can ask the queries and get the answers from the people, who are having the unique insights. This will help to people to learn from each other. Quora provides a set of interesting questions, related questions and user can allow other users to answer a question they find more appropriate to answer. Quora provides the facility to user to rank the answers based on how relevant and helpful is the answer. User can report the spam, plagiarism, etc. And can suggest the edits in answers to the author of that particular answer.
